NON-METALLIC COMPONENT ENTERS INTO JOINT VENTURE IN CHINA

Responding to customer demands for increased reduction in cost while maintaining quality, NMC in 2004 entered into an international joint venture with a Wisconsin POP manufacturer Hanksraft, Inc. The resulting formation is Han Ke NMC Injection Molding Company located in Suzhou, China.

Han Ke NMC Injection Molding Company's primary focus is on international markets, however it also provides unique opportunities for existing customers. This plant allows unequalled versatility when costing new and existing business. Currently this facility has eight new plastic injection molding machines and various value-added services including sonic and spin welding.

According to Les Gaunt, Engineering Manager/Owner, "Han Ke NMC has been established using our United States plants as its model. We have transposed our injection molding expertise; processes and procedures into the day-to-day operations of this plant thus giving it unsurpassed quality at a fair price. It also gives our customers the ability to deal with NMC's United States customer service or directly with the plant in Suzhou which operates just like an American job shop."

Non-Metallic Components was founded in 1985 and is headquartered in Poynette, WI with facilities in Cuba City, WI and Suzhou, China. As a TS 16949 certified company, NMC is committed to the highest level of quality and customer service.

For additional information about NMC please visit their website at www.nonmetallic.com or to find out more about plastic mold injection of filters and flow control visit www.moldedfilter.com.
